Summary

- Undergraduate security student targeting CERT, incident response, and security operations roles.
- Experienced monitoring, policy management, blocking rules, and response procedures in operational settings.
- Interested in automating repeated security checks and policy audits in real environments.

Skills

- **Security Operations**: Security monitoring, device management, policy and blocking rules, exercise response
- **DFIR**: Windows and Linux forensics, network forensics (Wireshark, PCAP), timeline reconstruction, incident analysis
- **Malware Analysis**: Static and dynamic analysis, PE structure analysis / IDA Pro, OllyDbg, x64dbg, Detect It Easy
- **Detection Rules & Threat Intelligence**: YARA / VirusTotal, ANY.RUN, Shodan, MITRE ATT&CK
- **Engineering**: Python (analysis and collection automation), Backend, DevSecOps, IaC
- **Languages**: Korean (Native), English (Intermediate), Japanese (Intermediate)

Selected Projects and Activities

- **Malware Analysis & YARA Rule Writing · SCH Cyber Security Research Center**
  Sep. 2025 – Present / Analyzing ransomware and infostealer samples and researching detection rules and automation.
  - Check PE structure, imports, strings, and obfuscation, then follow the execution flow; record findings as IoCs and YARA rules.
- **Stellar-Agent · IaC-Rule Set & MCP-Based Policy Audit Tool**
  Mar. 3, 2025 – Dec. 18, 2025 / Team project automating policy audits with IaC rule sets, MCP-based AI, SBOM, and reports; won the Grand Prize at the 2025 SCHU AI & SW Festival and co-authored the conference paper.
  - Owned the IaC part: implemented the CloudFormation parser (syntax validation, intrinsic tags, variable extraction) for the IaC-to-SBOM tool and contributed to part of the scanner integration.
- **Digital Forensics and Incident Response Competitions**
  Dec. 2022 – Dec. 2025 / Cross-validated disk images and logs to trace attacker execution and persistence and rebuild timelines.
  - Owned web server image analysis at HCCC 2025, matching eight command-bearing requests in the access log against the web shell code and confirming a root cron entry (a persistence setting) that ran a suspected backdoor file at boot and every hour.
- **Financial Security Academy 2025 Cyber Threat Response and Analysis Program**
  Jul. 8, 2025 – Nov. 7, 2025 / Studied financial-sector threat response and solved DFIR-focused CTFs; won the program-wide Top Excellence Award (Financial Security Institute President) as a team.
  - Competed in seven contests as a team, including three international CTFs; owned the forensics track at the White Hat Contest qualifier and personally solved two challenges, including recovering a hidden message from a PCAP; the team placed 4th in the university division and advanced to the finals.
- **i-Keeper / MFT Parser Improvement**
  Sep. 2023 – Feb. 2024 / Python. Built a PyQt GUI for the CLI-only analyzeMFT-based tool and hardened JSON exception handling.
- **BoB - Used-Goods Fraud Prevention Platform**
  Sep. 2020 – Dec. 2020 / Team project · Python, PHP. Owned listing collection from three marketplaces and the MySQL and ELK setup; the results were extended into a KCI-indexed paper.

Selected Experience

- **Republic of Korea Air Force** — South Korea
  Cyber Security Soldier, 825th intake — *Apr. 2021 – Jan. 2023*
  - Managed security devices, security monitoring, and security policies and blocking rules in a live operational environment.
  - Checked security events and device status, and reviewed the scope and potential impact of policy and blocking requests.
  - Shared operational issues with the people responsible and followed up with reports, took part in exercise response, and documented recurring issues in handover materials and operating guides.
- **SCH Cyber Security Research Center** — Soonchunhyang University
  Member / Malware and exploit kit analysis research — *Sep. 2025 – Present*
  - Research on malware and exploit kit analysis.
- **HSPACE FORENSIC LAB** — South Korea
  Member / HDFLAB — *Oct. 2025 – Present*
  - Solve the DFIR problem sets released each half-year and write analysis reports.
- **Anti-root** — Yeongnam Area, South Korea
  Founder and Team Lead — *May 2017 – Feb. 2023*
  - Founded and led a regional security research team and seminars.
  - Presented on honeypots, USB recovery, CloudGoat, YARA, and email forensics.
- **Busan Software Meister High School** — Busan, South Korea
  Club Mentor / Adjunct Teacher, Information Security Management — *Apr. 2023 – Present*
  - Appointed as a major-club mentor for four consecutive school years (2023–2026), advising student projects.
  - Taught the Information Security Management course as an adjunct teacher (Mar. – Jul. 2026).
- **i-Keeper** — DCU
  CERT / DEV Member — *Sep. 2023 – Jul. 2024*
  - Analyzed and improved an MFT parser on the CERT team and served as equipment manager on the DEV team.

Selected Awards

- **KISA President's Award** / 3rd Cyber Attack & Defense Scenario Competition for Cybersecurity Education & Training (ATHENA 2026) / Sep. 18, 2026
- **Honorable Mention(Korea Forensic Society President)** / 8th–11th Digital Criminal Investigation Contest (four consecutive years) / Dec. 15, 2022 / Dec. 18, 2023 / Dec. 17, 2024 / Dec. 16, 2025
- **Top Excellence Award(Financial Security Institute President)** / Financial Security Academy 2025 / Nov. 7, 2025
- **Excellence Award(Korea Housing Finance Corporation President)** / 1st Yeongnam Cyber Attack Defense Competition, University Team Division / Oct. 15, 2025
- **Excellence Award(KISA President)** / 6th Honam Cybersecurity Conference Incident Response Competition 2025 / Sep. 18, 2025
- **Honorable Mention(KIISC Honam Branch Chair)** / 5th Honam Cybersecurity Conference Intercollegiate Incident Response/Analysis Competition 2024 / Oct. 2, 2024
- **Top Excellence Award(ROK Air Force Chief of Staff)** / 44th ROK Air Force Information and Communication Competition, Cyber Defense Track / Oct. 26, 2022
- **Honorable Mention(KDFS President)** / KDFS Digital Forensics Challenge 2020 / Nov. 20, 2020

Education

- **Soonchunhyang University** — Asan, South Korea
  B.S. candidate, Department of Information Security (expected Feb. 2027) — *Feb. 2025 – Feb. 2027*
  - GPA: 3.73/4.5 (after senior spring semester)
- **Financial Security Institute** — South Korea
  Financial Security Academy, 3rd Cohort / Cyber Threat Response and Analysis Program — *Jul. 8, 2025 – Nov. 7, 2025*
- **Daegu Catholic University** — Gyeongsan, South Korea
  Computer Engineering major; Cyber Security double major — *Mar. 1, 2020 – Feb. 11, 2025*
  - Withdrawn (transferred to Soonchunhyang University) / Overall GPA: 3.97/4.50; Major GPA: 4.04/4.50
- **Korea Information Technology Research Institute** — South Korea
  Best of the Best, 9th Cohort / Digital Forensics Track — *Jul. 2020 – Mar. 2021*

Selected Talks and Publications

- **A Proposal on the Need for Preventing Fraud Damage in Online Direct Transactions: Focused on Fraud Determination Factors**
  KCI-indexed journal article, Korean Journal of Police Studies 21(1), pp.249–272, Mar. 2021, DOI: 10.22816/polsci.2021.21.1.009
  - Jangho Hyun, Dayeon Lim, Changyeob Lee, Jinwoo Lee, Hyunho Lee, Wonyoung Choi
- **Stellar-Agent: An AI Agent-Based Hybrid DevSecOps Policy Audit Framework Integrating IaC Rule Sets and Model Context Protocol (MCP)**
  2025 Korean Association of Data Science Winter General Conference Proceedings, Dec. 18, 2025, Paper No. 0032, p.118
  - Junyoung Jung, Changyeob Lee, Jeongmin Lee, Yusik Lee
- **Proposal of a Used-Goods Fraud Prevention Platform**
  Korea Institute of Information Security and Cryptology Winter Conference, 2020
  - Jangho Hyun, Hyunho Lee, Dayeon Lim, Jinwoo Lee, Changyeob Lee, Dongbin Oh, Wonyoung Choi
- **A Study on Domestic APT and Corporate Security Incidents**
  Korea Institute of Information Security and Cryptology Winter Conference, 2019
  - Changyeob Lee, Jinwoo Lee, Junghoon Lee, Museung Noh, Hyunsang Park
- **Problems and Countermeasures of Payment Card Hacking**
  Korea Institute of Information Security and Cryptology Winter Conference, 2018
  - Jinwoo Lee, Junghoon Lee, Changyeob Lee, Museung Noh, Hyunsoo Oh
- **A Study on RFID Skimming Attack Techniques**
  Korea Institute of Information Security and Cryptology Winter Conference, 2017
  - Gunwoo Kim, Taehyun Kim, Yuwon Seong, Sangjun Yeo, Jinwoo Lee, Changyeob Lee, Dalwon Lee

Certifications and Credentials

- AWS Certified Solutions Architect - Associate (Jul. 26, 2023 – Jul. 26, 2026, expired)
- Digital Forensics Level 2, Korea (Dec. 22, 2022 – Dec. 22, 2028)
- Craftsman Information Equipment Operation (Issued Dec. 2022)
- Exterro ACE / AccessData (Jan. 11, 2022 – Jan. 11, 2024, expired)
- Internet Information Manager Level 2 (Issued Oct. 2020)
- Linux Master Level 2 (Issued Oct. 2019)
- Network Manager Level 2 (Issued Dec. 2016 – Valid until Dec. 13, 2031)
